MARRIED.

KING-DAVIS, -- At the Roman Catholic Cathelinia, March 24th, by Rev. U. Kockmann, Mr. Jacon King to Miss Charlotte H. Davis.

PARKER -In this city, March Elich, the Rev. Benjandu f. Parker, in the 74th year of his age, a native of Realing.

NOTES OF THE WEEK

TEMPTING .- The list of good things advertised in day's lesue by Messrs. Heury May and Co. Read,

and sample, and buy. A mail may be expected by the barkentine Discovery, Capt. Shepherd, now due from Sun Fransou, With dates to March 15th.

ing news-the inaugural address of President flayes, the appointments under the new uministration, &c.

Steamer City of New York, Capt. Cavalry will be due from Sydney to-morrow morning, and will leave for San Francisco ten or twelve hours Mr Justice McCuily.

after arrival. CHARTS.—A very interesting chart showing the coates traveled by the stedge parties on the Ribaris fore Chief Justice Harris. spedition, may be seen at the Bookstore. Also a number of other Arctic charts on various scales.

There is probably no house in town which keeps as full and varied an assortment of general merchandise, as that of Castle and Cooke, whose new advertisement see in today's paper.

STAR KILAUEA .- The efforts to weld together the broken screw shaft of this vessel, of which we spoke last week, having proved unsuccessful, a new shaft has been constructed out of freeh iron, and it will be put into place to-morrow. The useful old craft will be ready for sea again by Monday next, when she will proceed to Hito.

BETTER YET.-Since our last issue we have been formed that the yield from one field of a hundred and six acres of cane on the Kohala Plantation, which was recently cut, averaged 10,125 pounds of sugar to the acre, or more than 536 tons from the whole field. And this was without irrigation. If any plantation can report a heavier yield on an equal or larger area, we shall be happy to announce the fact.

FUNERAL OF HIS LATE HIGHNESS KANAINA.—Inc.
funeral curemonies of the renerated father of His
Late Majesty Lunellio will take place to-morrow
from his late residence on Palace Walk. The programme of the order of procession may be found in
another calumn. The cutfin has been constructed
by Mr. Wicke, and is a fine specimen of workmanship. It is made of koa, the curving and ornamental
work being of very dark kos, forming an agreeable
contrast to the lighter colored kox.

H. I. R. M's S. IAPONETZ. - This transport which yesterday at ten o'clock A. M. for San Francisco, where she will join the Russian Fleet. During her stay here she has been completely refitted and repaired, and goes to sea in five condition. She will go over under steam, and will probably arrive there about the end of next week. Mr. F. A. Schaefet took passage by her. Previous to leaving the harbbr, salutes were exchanged between the ship and the Punchbowl battery.

DUM VIVIMUS VIVAMUS .- If the article on our fourth page on the future of the race can be believed, humanity has about reached its highest stage of de-velopment, and will begin soon to "top off" like a superannuated cocoa nut tree.

ALMOST A FAMINE. -The schooner Nettle Merrill, which arrived this morning from the windward reports that there is a great scarcity of flour and other edibles in Kohala, owing to the breaking down of the Kliauea and the non-arrival of schooners. Captain Crane generously divided his stores with some of the suffering families.

Coming In .- Five of the fifteen or sixteen whalers, which are expected here this Spring, have already arrived. Their names may be found in the commercial column. The last arrival was the Rain' bow, Capt Cogan, vesterday, with 460 barrels of oil. She reports the Florence as soon due here, and as having taken, when last heard from, 100 barrels. The two whalers have both been spending the season at Marguerita Bay.

Rain, -On Monday night there was a most gratefai shower of rain in the valley and town, which cooled the air, washed the dust from the folinge, and best of all, laid the dust of the etreets. We trust that the spell is broken-the spell of dry weather we mean—and that showers may be eather be both frequent and boantifal, otherwise the coming summer will prove exceedingly uncomfortable, and our water supply will run shorter than ever. How soon is the new reservoir to be commenced?

REAL ESTATE SALE.-The dwelling-house and premises on the corner of Beretania Avenue and unabou Street comprising ten or twelve acres of land lately owned by Mr. Agnew, have been purchased by Hon, H. A. Widemann, for \$6,000. It is understood that the purchaser intends to build on the vacant lot maked of the present dwelling nonec, the vacant lot maked of the present dwelfing touse, when he returns from Germany. This sale, as well as that noticed last week, ludicates that choice real estate is

BIRTHDAY OF THE EMPEROR. - Thursday last was liam of Germany. The Russian war vessel Inconitz. was dressed in honor of the occasion, and flags were displayed on the government buildings and foreign consulates. At noon, J. C. Glade Esq., foreign consulates. At moon, J. C. Glade E-q., German Consul at this port, received the congratuations of the King's suite, Hawaiian Government officials, representatives of foreign governments and others, and the health of ins Imperial Majesty was duly honoured.—F. C. Advertiser.

DEVELOPMENT.-Our neighbor or his itemizer, makes a desperate attempt to be funny at the expense of this journal, on account of our use of the word "development" in connection with the Commission appointed under an act "to aid in the development of the resources of the Kingdom." Any man-except perhaps an occasional "royalist"would quietly accept a single word selected from a abreviation. We do not "care a fig" what the the word may figuratively suggest "in the Queen's polite English," and we are confident that poone but the would-be humorist, thought of a "big b-ly" in reading our item. After his proud announcement a week or two ago that the pastry-cook of the City of Sydney is an old acquaintance, of whose culinary skill we had a most gratifying and highly satisfactory personal experience on a recent vayage on board the Colima," we can readily imagine that he might see suggestions of his divinity in about every other word in ordi-mary use, and especially after the grovelling admis-aion which followed the above quotation, viz; "we are always glad to neet old friends, particular-ly such as have furnished us with the bread, or in this case the cakes and aweetments of craving ani-mal tile." "Benig a Royalist ourself, we"-ob-serve the indignities offered the Queen's Eng-lish in these few words-"styled the gentlemen Royal Commissioners," Please make a note of that, O Commissioners, and when you come home, roward the toudy with a gift of "cakes and sweetments." Benig neither royalists nor to-dies we shall continue to use just such terms as we may ludge to be most autorografte and expresof his divinity in about every other word in ordiwe may judge to be most appropriate and expesive.

EUCALYPTUS PLANTING .- The Central Pacific Rullroad Company has arranged to have 40,000 enealyptue trees set out along 500 miles of the right of way of the company. This right of way embraces fifty feet each aide of the track, and thus ample room is afforded for removing the trees to a proper distance from the tracks to shield them from the effects of ing trains. The work of setting out these tre is to be prosecuted under the supervision of J. R. Scupham. The first trees will be placed along the line of the California Pacific Railroad. The species known as the euclyptus globulus will be used in this work, and the trees come from the nursery of G. C. Baxier, Alameda county. The object of this plan is to note what effect the planting of these trees will have upon the climate. It is the theory that large numbers of them will increase the humidity of the atmosphere and lessen the liability to droughts. wert of Haw schr. Kinsm. Hatfield, master.—Left in the Such her Fanning's Island and arrived Jan 7. It is that for Washington Island and arrived to fade; heft for Fanning's on the 14th and arrived on the left for Fanning's on the 14th and arrived on the left for Fanning's in the train of the Fanning's left for Fanning's in the caused the equator in long. The reason of the Fanning's in 24th Jarrh 2ad to storing the balance believed to have been lost by W. served at Fanning's an 24th. March 2ad to storing the balance believed to have been lost by the clearing out of our forests, as well as the scattering groups of valley trees. In this connection it is actor of the Central Pacific Railrood Company has stimulated the loquiry anew why it would not be an excellent strake of policy for this city to secure at least \$,000 or 6,000 of these trees at once, as the time for transplanting is good, to be placed by the city or citizens who will care for them until well rooted, in those districts of the city which are most liable to malarial influences. It is established that such experiments have been highly successful, notably that of the English Government at the Cape of Good Hope, and of the local government of a region in Beigium.—Sar. Union.

Supreme Court-In Probate.

Before Mr Justice McCully at Chambers. In the matter of the estate of A R Powers deceased. Pertition by Mary F Powers, widow of the hove decedent, that A Frank Cooke be appointed dministrator of the said estate. The Court heard evidence and ascertaining therefrom that M the evidence and ascertaining therefrom that Mr Cooke was a partner of the decessed appointed with consect of the widow to Wo Smith administrator of the estate to file a bond in the sum of \$1000,—and the Court further appointed him guardian of the minor children Emma and Maria upon his Bling a bond in the sum of \$500. Notice to creditors to be advertised for 4 weeks in the Hawaiian Gazette and inventory to be filed in 30 days. Administrator's accounts to be readered in 6 months.

TO THE EDITOR OF THE HAWAHAN GAZETTE:

DEAR SIR:-I am very glad to observe that both the Gazerre and Advertiser have brought their batteries to bear upon an object too long tolerated in our midst by both the authorities and citizens, of our once remarkably healthy city, which every easual so every year from lack of absolutely necessary saul-

tary precautions. While considering the subject, I have failed to see the feasibility of a remedy as heretofore ordinarily applied to more populous and wealthy cities by means of sewers, for the reason, first, that our city pense of such a system of underground sewage as would meet the exigency of the case, and I am not convinced of the equity of making the public treasu ry to defray it.

Second, there is not in my opinion sufficient incline to carry off the feedient accumulations of the city without the and of water, which at present we have not to spare for that purpose.

But I think there is a very simple and inexpensiv way by which the noxious, fearful, and pestilential evil now existing may be completely remedied.

The plan I would propose, and which is based upon an experience of more than thirty years in Hwnotals, -is for the Interior Department to provide a moderate sized shed or building in a central location fill it with dry earth which is at hand and abundant, procure from the assessors' books or otherwise a list of property holders, lessees, or occupyers of dwelling places in the city, and require all to take from said spository of earth, sufficiently often, and in quantity sufficient to keep their premises free from the foul effluvias which now most one on every street, -- noting the date and quantity delivered to each, and naking it the business of the party delivering it or some one else, to see that it is cred for the purpose

ernment.

There is no doubt a great mistake was made a few years ago and which is still persisted in, when a statute or regulation from the Interior Department was promulgated requiring all vanits for the deposit of excrementitial substances to be unde not less than nine feet deep. Many excavating for that purpose came to water, either pure springs or drainage, and in all such cases, except possibly some in the lower

came to water, either pure springs or drainage, and in all such cases, except possibly some in the lower parts of the city affected by daily tides, the result has been most unsatisfactory and unwholsome.

The system adopted in Paris, cannot he made available here at present, though, there is no doubt if undertaken by a competent person, a substance could be produced which could readily be transported in bags, buxes, or barrels, and which almost every planter would be warranted in purchasing at a price that would affird a good profit on the labor expendent upon it. ed upon it.

With shallow vanits and a judicious use of dry

With shallow wants and a judicious use of dry earth, or ashes, or both, focal deposits may at all times be kept un fleosive and at any time removed to enrich flower beds, shrubs, trees or fields, or to a place of deposit aveigned by the authorities, without the slightest annoyance to sensitive organs. There is I am informed, already in our midet a new threat disease more or less prevalent, which may or may not be attributable to the abominable atmosphere our citiens are now compelled to inhale in passing localities not well avoided. Whether the disease is or is not transable to the fact you have but rectain. partially portrayed, no one will undertake to say said facts are not sufficient to produce consequences which demand immediate reform.

Yours truly, A. B. March 20th, 1877.

Notice.

DURING MY ABSENCE PROM THIS Kingdom, W. H. SHIPMAN, will act for me under power of Attoriety.

Hilo, March 25d, 1877.

W. H. REED, 687 Inc.

Administrator's Notice.
